Whole School Marking Policy

We believe marking should provide constructive feedback to every child, focusing on success and improvement against learning intentions and success criteria. Marking should help children to become reflective learners and give them strategies to be able to improve their work and take the next steps in their learning. We aim to provide a system of marking that is consistent and continuous, across each year within our school, that informs and influences our planning and which enhances children's learning.

Aims:

Effective marking should:

- Give feedback to children, inform them of their achievements and the next steps in their learning
- Relate to learning intentions and success criteria for each lesson
- Give children specific praise for the success of their work, showing it is valued
- Give children clear strategies on how they can improve their work
- Help teachers evaluate teaching and inform future planning and next steps in learning
- Show consistent codes and procedures throughout the school
- Provide a tool for teacher assessment
- Help parents to understand the strengths and areas to develop in their children's work.

Informal Formative Assessment

- Teachers will give children verbal feedback during lessons and will note when this has been done by writing 'v' inside a circle on the child's work

Who?

We recognise the shared responsibility and accountability for every child's progress and so, teachers, TAs, peers and children themselves will have an opportunity to implement the marking policy. Parents will also be asked to provide a 'tickled pink' and a 'green to grow' statement for their child at Parents Evening.

When?

Where possible, marking should be done during the lesson or as close to the end of the lesson as possible. Children will be encouraged daily to refer to the targets and next steps following marking assessments.

Our Lady & St Joseph Catholic Academy Steps to Success in Marking:

1. Highlight the LI in the appropriate colour:
 - a. Highlight the LI in pink if it has been achieved- this notes that you are 'tickled pink' and they will be treated to a challenge at the end of the work
 - b. Highlight the LI in green if it has partially been achieved- this tells the child they are 'green to grow' and should look at their next steps
 - c. Highlight the LI in orange if it has not been achieved- these children will be supported in a guided group during 'reflection time'
2. Highlight two examples of how the child achieved their 'tickled pink' in pink
3. Highlight two 'green to grow' areas for development in green
4. Choose one 'shoot to success...' statement (this statement should either provide a reflective challenge or address an area for development highlighted in the child's work)
5. Shoot to Success should be differentiated three ways, allowing children to choose the right level to allow them to progress

Reflection time will be provided for children to address their 'shoot to success' challenges either at the end of a lesson or at the start of the next lesson. As children arrive at school at 8.55am, they may be expected to look at their books and address their next steps before prayer time begins.

Our Lady & St Joseph Catholic Academy Marking Policy

This is my chance to make a difference to my learning progress and the progress of my classmates!

Question 1

Has the Learning Intention been achieved?

If the answer is 'YES', highlight it neatly in pink- this means we are tickled pink with what has been achieved this lesson

If the answer is 'PARTLY or ALMOST', highlight it neatly in green- this means the learner is 'green to grow' and needs to develop further next lesson

If the answer is 'NO', highlight it neatly in orange- this means more help next lesson

Question 2

How do I know the Learning Intention has been achieved or almost achieved?

Find two examples of where the learning intention or success criteria has been achieved and highlight them neatly in pink- this celebrates great work! If there is no improvement needed, provide the learner with a 'Shoot to Success' challenge.

Question 3

What does this learner need to do next to improve?

Highlight two things that need improving in green and indicate to the child how they can move their learning on by improving on the work they have done.
